

COIL & MEASURE LINE

Proudly manufactured by Powerhowse Electric, the Short and Standard Coil & Measure Line supports the decoiling of cable from the main drum to either a smaller drum or coil. The measure head and guide roller assist with the in the accurate measure of the cable. The measure head can handle 5mm to 30mm diameter. **(Drum Jacks not included)**

The **Standard Coil & Measure Line** is based on a four-wheel trolley pallet which allows easy movement in warehouses. It has two attachments, one for coiling single spools of cable, rope or hose and the other attachment has drum attachment with centring cones for coiling from drum to drum.

The **Short Coil & Measure Line** is based on a four-wheel trolley pallet which allows easy movement in warehouses. It has one spool attachment for coiling single spools of cable rope or hose.

Standard Coil & Measure Line
