

COIL & MEASURE LINE

Proudly manufactured by Powerhowse Electric, the Short and Standard Coil & Measure Line supports the decoiling of cable from the main drum to either a smaller drum or coil. The measure head and guide roller assist with the in the accurate measure of the cable. The measure head can handle 5mm to 30mm diameter. **(Drum Jacks not included)**

The **Standard Coil & Measure Line** is based on a four-wheel trolley which allows easy movement in warehouses. It has two attachments, one for coiling single spools of cable, rope or hose and the other attachment has a drum attachment with centring cones for coiling from drum to drum.

The **Short Coil & Measure Line** is based on a four-wheel trolley which allows easy movement in warehouses. It has one spool attachment for coiling single spools of cable rope or hose.

Standard Coil & Measure Line
