

COMMERCIAL DRUM RACK

Our Commercial Drum Rack range is versatile and adaptable. We can either supply these with 1, 2 or 3 bay (the one in the photo is a 3 bay unit) depending on your companies requirements. Each bay can hold either 3 or 6 spindles for drums of cable to sit on. There are 3 spindles towards the front of the rack and 3 at the back. The back rack is ideal for storing smaller drums of cabling whilst the front rack is better suited for larger drums as these are bulkier and heavier to handle.

It is easy to remove and replace the spindles once loaded as they load in from the top of the bracket and slot into place.

Note: this unit is bolted to the floor it cannot easily be moved once in place. This racking is more suited for electrical wholesalers or contractors who have multiple drums of cable that they require access to and storage of.

CODE	DISCRIPTION	DIMENSIONS L x W x H
50080	Single Bay C/W 3 Spindles	1060 x 1200 x 2200
50081	Single Side Double Bay C/W 6 Spindles	2000 x 1200 x 2200
