

MANDREL

We supply a range of equipment for your conduit needs. Our mandrels, also known as Proving Pigs are used to prove conduits before hauling in cables and after debris/water has been removed. We offer mandrels made from either aluminium or wood as well as Aluminium Mandrel from Condux International. Our sizes range from 50mm diameter to 200mm diameter with an overall length of twice the diameter of the mandrel. For use, you will want the mandrel to be less 10% of the diameter ID of your conduit. You must use with two ropes.

Our Wood range is New Zealand Made in our Workshop and can be custom made to a diameter and length suited to your requirement with galvanised eye bots on each end. Special 1m Long Mandrels can be made on request.

Wooden Mandrel

Aluminium Mandrel
